

Sound Blaster X-Fi Xtreme Audio PCI Express

Maximise the audio potential of your new PCI Express-ready PC.

Upgrade your new PC to award-winning Sound Blaster X-Fi Xtreme Fidelity audio! Creative's Sound Blaster X-Fi Xtreme Audio PCI Express transforms MP3 music and movies over headphones or surround sound speakers. X-Fi Crystalizer restores the details and vibrancy lost during MP3 and DivX compression, breathing life back into any audio. X-Fi CMSS-3D expands stereo music and movie sound tracks into amazing surround sound even over regular headphones, with OpenAL and EAX 4.0 support for enhanced gaming. The perfect addition to PCI Express-ready PCs, this Windows Vista compliant card features extended connectivity thanks to its integrated digital optical input and output.

- Full height Windows Vista compliant PCI Express card for the latest desktop PCs.
- X-Fi 24-bit Crystalizer restores the details and vibrancy lost during audio compression, enhancing MP3/WMA music, DivX movies, TV and radio.
- X-Fi CMSS-3D Surround up-mixes MP3 audio to 5.1 or 7.1 surround. X-Fi CMSS-3D Headphone delivers incredible surround sound for movies and music over stereo headphones.
- Free download of Cyberlink's PowerDVD software with DTS® and Dolby Digital®-EX decoding for the ultimate in DVD movies. Enjoy immersive gaming over headphones with OpenAL and EAX 4.0 support.
- Entertainment Console gives easy setup and control.
- Comprehensive connectivity includes an integrated digital optical input and output.
