Benefits of my-Ditto

THE BENEFITS THE MY-DITTO NETWORK STORAGE SOLUTION - VERSATILITY

my-Ditto network attached storage solutions free you to stay connected. Wherever you go, simply use the my-Ditto USB key on your computer, or the app on your smart phone or tablet, to access, store, share and stream your digital files. The my-Ditto NAS solution quickly responds—grabbing that school paper you forgot or delivering that work presentation you need. For individuals and small businesses, my-Ditto extends your entire network while meeting your storage needs—anywhere.

“Ever wanted a simple way to access your home or office servers remotely? If yes, then look no further than the new my-Ditto.”

- Chris Brandrick, MacWorld

Backup Your Data—Protect Your Network with Data Storage

With your my-Ditto USB key and a click, you can copy your files to your my-Ditto. As you update them, so does my-Ditto—backing up every change to protect your network from data loss.

Share Your Files—Experience Your Files Together

Share your files with your loved ones. Using the my-Ditto USB key, you can copy your files such as, photos, documents, videos and music to the my-Ditto server. Then, you can all access them to laugh, remember or learn together.

Multimedia—Be Entertained

Merge your multimedia into one media center. Using the my-Ditto USB key, you can copy all of your media to the my-Ditto and remotely access it from anywhere. Plus you can stream files directly to your TVs, Media Adapters, Digital Picture frames and Gaming Consoles.

Easy to Plug 'N Play in Every Way

Just connect the my-Ditto to your router and the my-Ditto USB key to your home or office computer. my-Ditto copies that computer's files to the server's external network hard drives. my-Ditto is the plug and play network storage solution for Macs and PCs.

No configuration required, just, plug the my-Ditto USB key into any desktop or laptop near and far-and through secure, shared network storage, open or play any of the files! You can also use the free my-Ditto app to access your files on your smart phone and tablet.

Easy Set-up:

my-Ditto keys in and serves you innovatively convenient technology without the typically inconvenient cost. Learn more about how to use and benefit from my-Ditto every day—personally and professionally.

Build Safe and Secure Network Storage

my-Ditto assures safe and secure network storage through:

- Two-factor authentication—personalized USB keys and password protection.
- RAID 1 mirroring storage using two hard drives on the server.
- AES 256-Bit Encryption, ensuring that you and only you can see what is being transferred.

All Your Files,
Out of Thin Air

Home Solutions

YOU CAN GO HOME AGAIN—ANYWHERE WITH MY-DITTO

Remotely access and share your hard drives at home while securely extending your home computer network anywhere. All you need is the my-Ditto USB key to copy and store your PC and Mac hard drives, without any technical know-how. The personally rewarding effect? Internal and remote access to media and other types of files on your desktop, laptop, and smartphone. Another outcome is your very own media center, using my-Ditto to stream multimedia to TVs, media adapters, and gaming consoles!

Whether you want to play funny videos for your friends or need your critical files back if your home PC dies, you're personally prepared with my-Ditto network attached storage (NAS) solutions.

“If you are looking for a network storage solution that you can access remotely, the my-Ditto could be one of the simplest and surprisingly cost effective solutions out there.”

- Sean Fallon, Gizmodo

Easy Hookup for Remote Access to my-Ditto and Other Benefits

For home hard drive access, sharing and backup with my-Ditto, simply:

- Connect the my-Ditto to your router
- Connect the my-Ditto USB key to any home computer
- Take some personal time while my-Ditto copies your files to the server's external network hard drive

As a result, you beneficially enjoy a home NAS solution that:

- Rids software installation and system configuration
- Accesses your network through a small, lightweight key that rapidly establishes a direct connection without third-party providers—answering, "How do I get remote access?"
- Substantially reduces the cost of virtual private network (VPN) solutions
- Works on mobile handhelds running Windows® Mobile 6.1 and higher, Android, and iPhone using the my-Ditto remote access software app that's free and secure
- Requires two-factor authentication with personalized, password-protected keys
